EDUCATION

New York University

Bachelor of Science in Computer Science and Data Science, minor in Business Studies

GPA: 3.7/4.0

Coursework: Object Oriented Programming, Algorithms, Operating Systems, Parallel Computing, Data Structures, Applied Internet Technology (Full stack Development), Machine Learning, Artificial Intelligence, Natural Language Processing, Database Management Analysis, Calculus, Linear Algebra, Micro/Macroeconomics, Management

EXPERIENCE

New York University

Apr 2025 - Present

Lead Full Stack Software Engineer

New York, NY

- Design, develop and maintain scalable full-stack web applications serving 40,000+ students using NextJS, Prisma ORM, GraphQL, MySQL, PHP, etc. Lead development of critical university portals: Foreign Language Placement Exam Portal, ULC Scheduler, Advising Portal, Petition Portal, etc.
- Spearhead agile development processes and cross-functional team collaboration, delivering 30% faster sprint iterations while maintaining high code quality standards through comprehensive testing and code reviews

Scale AI

May 2024 - Present

AI Code Quality Engineer

New York, NY (remote)

- Execute comprehensive code review and optimization for AI training datasets, improving model accuracy by identifying and resolving critical software engineering anti-patterns
- Design and implement production-ready algorithms and data structures to solve complex computational challenges, ensuring optimal performance and maintainability

Huaxi Securities Co., Ltd.

June 2023 – Aug 2023

Software Engineering Intern - Web Application Team

Chengdu, Sichuan

- Enhanced application reliability by implementing comprehensive End-to-End (E2E) testing framework using Cypress, reducing production bugs by 40% and improving deployment confidence

SELECTED PROJECTS

Lobster AI | NextJS, Vercel, Prisma ORM, MongoDB, Tailwind CSS, CI/CD

Ongoing

- Built production-ready AI SaaS platform with multi-modal capabilities (chat, code, music, image, video generation), implementing secure authentication and subscription management for scalable user growth
- Architected robust backend infrastructure using NextJS and Prisma ORM with MongoDB, deployed on Vercel with automated CI/CD pipelines for seamless feature delivery
- Visit: lobster-ai.vercel.app/ | Repo: github.com/jsl1114/Lobster-AI

SHell | C

Dec 2024

- Engineered custom Linux shell implementation featuring advanced process management, signal handling, and I/O redirection capabilities
- Implemented core system functionalities including program execution, process lifecycle management, and built-in commands (`cd`, `exit`, `fg`)
- Repo: github.com/jsl1114/SHell

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C, Swift, HTML/CSS, SQL, $\LaTeX$

Frameworks & Libraries: ReactJS, NextJS, Angular, Node.js, Express.js, VueJS, React Native, Flutter, PyTorch

Databases & Cloud: PostgreSQL, MySQL, MongoDB, AWS (EC2, S3, CloudFront), Firebase, Supabase, Prisma ORM

DevOps & Tools: Docker, Git, VS Code, Kubernetes (K8s), CI/CD, Bash, Google Cloud Platform, Vim, Kafka, RabbitMQ

AI Awareness: Cursor, Windsurf, GitHub Copilot, OpenAI API, Anthropic Claude, Google Gemini, Vercel AI SDK, LangChain, LlamaIndex, Pinecone, Weaviate, Prompt Engineering, RAG Workflows

CERTIFICATES / COMMUNITY INVOLVEMENTS

FullStack Open | [certificate](#)

Jan 2023 – Sept 2023

- Completed intensive 200+ hour program in modern full-stack development from University of Helsinki, mastering ReactJS, Node.js, GraphQL, and REST API design with 20+ hands-on project implementations

RISE Against Hunger

Sept 2020 – May 2022

- Participated in meal packaging events that prepare healthy, balanced meals for children in underrepresented areas
