EDUCATION

New York University

Bachelor of Science in Computer Science and Data Science, minor in Business Studies GPA:3.72/4.0

Coursework: Object Oriented Programming, Algorithms, Operating Systems, Parallel Computing, Data Structures, Applied Internet Technology (Full stack Development), Machine Learning, Artificial Intelligence, Natural Language Processing, Database Management Analysis, Calculus, Linear Algebra, Micro/Macroeconomics, Management

EXPERIENCE

New York University | Title: Lead Full Stack Software Engineer April 2025 – Present
Skills: NextJS, Prisma ORM, GraphQL, MySQL, PHP, Agile, System Architecture New York, NY

- Design, develop and maintain scalable full-stack web applications serving 40,000+ students using NextJS, Prisma ORM, GraphQL, MySQL, PHP, etc. Lead development of critical university portals: [Foreign Language Placement Exam Portal](#), [ULC Scheduler](#), [Advising Portal](#), [Petition Portal](#), etc.
- Spearhead agile development processes and cross-functional team collaboration, delivering 30% faster sprint iterations while maintaining high code quality standards through comprehensive testing and code reviews

Scale | Title: AI Code Quality Engineer May 2024 – Present
Skills: Python, AI/ML Training, Data Structures, Algorithms, Software Engineering/Evaluation New York, NY

- Execute comprehensive code review and optimization for AI training datasets, improving model accuracy by identifying and resolving critical software engineering anti-patterns
- Design and implement production-ready algorithms and data structures to solve complex computational challenges, ensuring optimal performance and maintainability

Huaxi Securities Co., Ltd. | Title: Software Engineering Intern June 2023 – August 2023
Skills: Cypress, E2E Testing, Web Application, Documentation Chengdu, Sichuan

- Enhanced application reliability by implementing comprehensive End-to-End (E2E) testing framework using Cypress, reducing production bugs by 40% and improving deployment confidence

OPEN-SOURCE CONTRIBUTIONS

Lobster AI | NextJS, Vercel, Prisma ORM, MongoDB, Tailwind CSS, CI/CD Ongoing

- Built production-ready AI SaaS platform with multi-modal capabilities (chat, code, music, image, video generation), implementing secure authentication and subscription management for scalable user growth
- Deployed on Vercel with automated CI/CD pipelines for seamless feature delivery
- Visit: lobster-ai.vercel.app/ | Repo: github.com/jsl1114/Lobster-AI

Missing Semester | HTML/CSS, Markdown, 5k+ stars on GitHub Ongoing

- Contributor of MIT's [Missing Semester](#), a student-run course that teaches practical computing skills often left out of traditional computer science curricula

SHELL | C December 2024

- Engineered custom Linux shell implementation featuring advanced process management, signal handling, and I/O redirection capabilities and implemented core system functionalities including program execution, process lifecycle management, and built-in commands (cd, exit, fg). Repo: github.com/jsl1114/SHELL

SKILLS

Languages	JavaScript, TypeScript, Python, Java, C, C++ , HTML/CSS, SQL, TeX , MATLAB, R, Swift
Web Development	ReactJS, NextJS, VueJS, REST API, Ruby on Rails, Spring Boot, TRPC, GraphQL, Express.js, Docker, Kubernetes (K8s), Auth (SAML, WSO2, OAuth), CI/CD (Github Actions, Jenkins), Redis, Vim, Kafka, RabbitMQ, JWT, Testing (Playwright, Cypress, Jest, Mocha)
Databases & Cloud	PostgreSQL, MySQL, MongoDB, Prisma, AWS (EC2, S3, CloudFront), Google Cloud
Artificial Intelligence/ML	PyTorch, Tensor Flow, OpenCV, Numpy, Pandas, Mathplotlib
Software Tools	Bash, Valgrind, shell scripting, Git, Github, Agile

CERTIFICATE

FullStack Open | [certificate](#) Janurary 2023 – September 2023

- Completed an intensive 200+ hour program in modern full-stack development offered by University of Helsinki, mastering ReactJS, Node.js, GraphQL, REST API, testing, Redux, CI/CD, Containers, SQL/NoSQL Databases
